Three cases of H1 N1 have been confirmed in the women's unit at the Surrey Pre-trial Services Centre.

All three women were given Tamiflu as soon as they fell ill.

Authorities say some flu cases are to be expected in the jails at this time of year.

They also say the sick inmates are being isolated and other inmates are being monitored.

Flu shots are made available to inmates at all bc correctional facilities when they are admitted, and when any symptoms start to show.
